

COMMUNICATION SOLUTIONS

Need Reliable, Responsible Communication Solutions? Call the Best Minds in the Business!

Only Total Safety has the people, programs and processes to equip your organization with the industry's best portable two-way communication systems to keep your workers safe and in constant contact.

With Total Safety's communication solutions, you can:

- Increase safety by providing immediate communication in emergency situations
- Maximize productivity by allowing workers to communicate quickly
- Rent or purchase top-quality equipment at competitive prices

Our high-performance, durable Motorola portable radios deliver reliable communication without the need for a network provider. For you, this means there are no network contracts to sign or minutes to buy. The push-to-talk function also means that workers can stay in contact more easily and efficiently than they would using networking radios.

Dependable Communication Solutions for Every Job

Total Safety's portable radios can be applied to a variety of uses and customized for your specific needs. Applications include:

- Maintenance
- Turnaround projects
- Unit start-ups
- Training
- Confined space
- Shutdowns
- Rescue/emergency
- Bottleneck
- Firewatch
- In-Plant Service Centers

Total Safety's radios are intrinsically safe, FM-approved and OSHA compliant. This makes them ideal for plants and refineries that have stringent requirements for communication equipment due to hazardous situations. We also offer rentals and support of trunking radios for plants with trunking systems installed at their facility.

Many times, a certain job or location requires radios to be programmed to a specific frequency. That's why Total Safety offers custom frequency programming for you.

The Best Minds in the Business!

Rugged Durability and Superior Reliability

Total Safety is proud to be an authorized parts and accessories dealer for Motorola devices. Motorola offers the highest quality hardware, software and expertise available, which results in consistently reliable communications.

Motorola radios are built to last. Their rugged, intrinsically safe design makes them ideal for use in the industrial field where high voltage and other hazardous conditions are present. Because of their dependability and durability, Motorola radios result in the highest possible return on your investment.

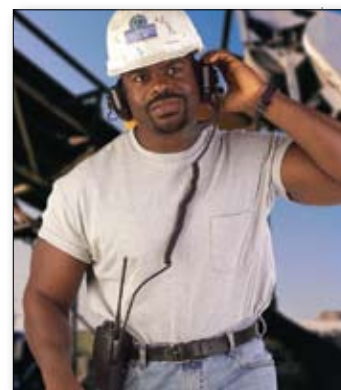

Convenient, 24/7 Service and Support

Total Safety's exceptional, around-the-clock service and support provide the convenience and peace of mind you need to keep communication running smoothly and safely.

Our expertise in communications, combined with 24/7, on-site technical support, deliver the most reliable service available, whether for short- or long-term projects. And because we offer rentals and service of Motorola radios at our In-Plant Service Centers (IPSCs), you can get the equipment you need at a moment's notice, without having to leave your location.

In-Plant Service Centers (IPSCs)

Onshore or offshore, Total Safety's certified, licensed technicians can meet all of your communication needs at your location with an In-Plant Service Center (IPSC). Our exclusive on-site IPSCs are equipped with state-of-the-art equipment to ensure work is performed professionally and safely and is delivered on time and on budget.

See what a difference the Best Minds in the Business can make to your safety, operational and financial performance. Our mission is to ensure the safe Wellbeing of Workers Worldwide (W³).
