

# SAFETY PERSONNEL SOLUTIONS

## Need Reliable, Specialized Safety Personnel Solutions? Call the Best Minds in the Business!

Total Safety has the people and processes to ensure that only the highest caliber of Specialized Safety Personnel (SSP) is assigned to each of your projects. Whether you rely on our Safety Attendant or Safety Professional services, you can trust that our high standards increase safety and efficiency and reduce your costs.

### Our Safety Attendants Are the Total Package

#### Experience

- Providing confined space/firewatch/bottlewatch safety personnel for 18 years
- Total Safety's classroom and hands-on assessments are tailored to each project
- We only employ tenured, experienced supervisors

#### Cost Savings

- SSP billing rates are more competitive than "craftsman" billing rates
- Craftsmen are not tied up performing attendant duties, therefore production is not adversely affected
- All attendants are hired locally, with the exception of rural plants, refineries and overseas projects, in turn limiting per diem and other expenses
- SSP reduces the number of multiple contractor employees by having a centralized pool of trained safety attendant personnel that can be dispatched and assigned to all areas of the project, thus reducing the total man-hour costs of the project

#### Housekeeping

- All safety personnel perform light labor
- Overall efficiency is increased by continuous housekeeping during downtime

### Hiring the Best People for Your Project

Each step of our rigorous hiring process is designed to recruit and maintain only the highest quality of skilled workers.

#### Total Safety's strict recruitment process includes:

- Hiring process – Includes background check and drug test
- Human resources – HR Manager ensures enough qualified personnel are on the job
- Classroom assessment – Incorporates your specific permits, policies, procedures and equipment
- Field assessment – Includes a simulated confined space, live fire drills, fresh-air equipment overview and hands-on gas detection instruction
- Customer service – Ensures that customer service is always foremost in the minds of SSP personnel

The Best Minds in the Business!

# TOTAL SOLUTIONS

Total Safety's Specialized Safety Personnel increases safety and efficiency, while lowering costs.

- Safety – We maintain your polices, procedures and permit systems
- Efficiency – We supplement the safety needs of turnarounds
- Cost – Production grows and your bottom line increases

## The Best Safety Professionals in the Business

Total Safety's exclusive safety professionals supplement your safety needs so you can be in the business of focusing on your bottom line.

- Turnaround planning
- Writing confined space plans
- Developing LOTO and blinding plans/procedures
- Permit writing
- Writing and issuing safety plans for high-risk work
- Atmospheric monitoring
- Daily field auditing of contractors
- Conducting safety meetings
- Investigating all accidents, incidents and near-misses
- Managing all injury cases
- Training contractors on safety plans

## High Standards Result in the Highest Quality

All safety professional applicants undergo a lengthy interview and evaluation process prior to being hired by Total Safety. This ensures that only the best safety professionals are assigned to your project.

- We only employ safety personnel personally recommended by our core group of safety professionals
- Each safety professional must have a minimum of 10 years experience in the safety sector of the petrochemical/refining industry
- Every new safety professional is interviewed by senior management
- Our safety professionals must have a positive attitude and must be able to work with owners and contractors
