Wellness screenings to protect the health and wellbeing of workers

COVID-19 SCREENING STATIONS

Reduce the spread of COVID-19.

Your workforce is your most valuable asset. Though work sites have been made safer through stricter standards being enforced by the Centers for Disease Control (CDC) and the World Health Organization (WHO) plus the use of advanced personal protection equipment, the threat of workplace exposure is unavoidable.

The first step in containing the risk of spread of COVID-19 is to have additional safety precautions and necessary oversight plans in place so individuals can be protected. Increase your level of preparedness to manage and care for new cases of COVID-19 with Total Safety.

Onsite Medical Evaluations and Monitoring.

At Total Safety, worker wellbeing is what drives us to be one of the safest companies in the world. We have taken extra measures to educate our team on the latest evaluation protocols for the COVID-19 virus according to the strictest standards in compliance with CDC, WHO and our Medical Director.

Total Safety has trained and equipped teams ready to navigate you through this pandemic. We offer health evaluations and monitoring support to ensure all precautions are being taken to protect your employees and the worksite.

Healthy Worker Population & Confidence.

Having professional medical resources and an emergency management plan in place will help your employees feel confident about showing up to work knowing that extra measures are being taken to monitor their health and environment.

Total Safety can provide a level of care beyond medical staff and equipment, being experts in emergency planning and preparedness for your entire job site. In addition to turnkey medical services, we offer products to protect workers remotely with video surveillance, push to talk communication equipment, atmosphere monitoring, breathing air systems, and much more.
